

ENVIRONMENTAL POLICY

KempPi Oy

KempPi is an arc welding expert that provides its customers with innovative solutions. KempPi solutions consist of equipment, software and services. In continuously developing our organization, activities and products, we take into account the following aspects:

- The environmental impacts and energy efficiency of our infrastructure, working environment and work processes
- Sorting and recycling of waste produced, as well as reducing the quantity of landfill waste
- Producing goods in an environmentally friendly way by selecting low-impact, recyclable raw materials and components.

It is a central principle of KempPi Oy's environmental policy to conform to and monitor environmental legislation and provisions and any instructions and orders from public authorities on environmental issues. We encourage our partners and staff to pay attention to their environmental impact as well. We will openly respond to interest groups on any questions pertaining to environmental issues.

This environmental policy is applied to KempPi Oy's management and it is part of the company's comprehensive business quality policy. We set targets and evaluate our progress regularly in the management meetings.
