

HEALTH AND SAFETY POLICY

Kemppi Oy

We will advance the development of occupational health and safety culture and attitudes throughout our operations. We will maintain and promote safe and healthy working conditions with the principle of continuous improvement.

We will pay attention and commit to fulfilling legal requirements and orders of the authorities.

We will include and encourage our personnel to continuously observe and improve safety at work. We will provide induction training and courses for our personnel on occupational health and safety.

We will evaluate the risks related to each assignment and take measures to remove or prevent them. We will report any accidents and learn from them.

The implementation and quality level of occupational health and safety is evaluated on a regular basis by the industrial safety committee that also steers the operations of occupational health care.
